Did You Know?

We're here to offer advice on any DIY project if you suddenly get the urge to work on your home while you're quarantined in it. From the materials you'll need to the steps involved, we'll answer your questions and give you some pointers. Give us a call during regular business hours at 508-505-8001 and we'll try to help.

COVID-19: Our Response

With the outbreak of COVID-19 and the advent of social distancing, Mitchell Construction Group has adapted operations to ensure the ongoing health and safety of our people, clients, and communities.

We continue to follow CDC guidelines and government orders while remaining as flexible and accessible as possible for local homeowners. Our services may be limited at this time, but we are open for business and ready to help in any way we can. Just because we're keeping our distance doesn't mean we can't keep in touch and:

- Answer your questions
- Offer DIY advice
- Handle home-related emergencies
- Hold virtual meetings
- Provide design services
- Perform outdoor projects

Spending all this time at home may well have got you noticing things you'd like to change about your house. If you're itching to get started on a project, we can walk you through how to take the photos and measurements we'd need to put some designs together. Our proven process works just as well via video chat as it does in person! And we can even ship samples to help you select everything from cabinets to tiles to flooring.

So while many of our tools may be different at the moment, our commitment to being responsive and responsible remains as strong as ever. Please don't hesitate to get in touch if we can be of assistance in any way—to you, your neighbors, a frontline worker, an elderly relative, or anyone else.

RECENT WORK

DECKED OUT FOR SUMMER

As winter ends and warmer weather is upon us, we can't help but start dreaming of summer days. Sunny weekends spent by the pool, cookouts with family, and late-night campfires are what keep us looking past the cold and rainy days to a time when we can all be together outside again. Of course, having the perfect space makes that time all the more enjoyable, and last year we were able to bring one family's dream to light with the help of our friends at Natureworks.

After moving to Massachusetts from Hawaii, this family was looking to do a complete overhaul of their new home to replicate the paradise they had just left. They hoped to take their outdated house and give it character and style, custom designing it to become the home of their dreams. They wanted to add a lot of unique character to the front façade of the home, as well as a lot of entertainment space in the back—including a grill area built into their new deck.

(continued on the next page)

A full exterior remodel was done on the home including new siding, trim, shutters, exterior lighting, and a front porch. It also included an expansive back deck featuring an outdoor kitchen, multiple levels, and a covered space for entertaining. A dining area covered by a custom pergola was built off to one side of the grilling space, a few steps away from a comfortable sitting area. A massive amount of landscaping was completed by Natureworks, including the pool, fire pit, and stunning greenery.

With a beautiful view of the whole back yard, the deck is the perfect addition to this home, giving the owners the ideal outdoor space for endless entertaining and enjoyment for decades to come.

THE MITCHELL
KITCHEN

Crockpot Chicken Soup!

ingredients

- **1 ½ lbs.** Boneless skinless chicken breast
- **1 large onion**, chopped
- **3 carrots**, peeled and sliced
- **2 stalks celery**, sliced
- **4 tsp.** Fresh thyme
- **4 tsp.** Fresh rosemary
- **3 cloves garlic**, minced
- **Salt**
- **Black pepper**
- **10 cups** low-sodium chicken broth
- **8 oz.** Egg noodles

instructions

1. Chop, slice, and mince your onion, carrots, celery, and garlic as mentioned in the ingredients above.
2. In a slow cooker, combine the chicken, onion, carrots, celery, thyme, rosemary, and garlic, and season generously with salt and pepper to your desired taste. Pour in the chicken broth.
3. Cover and cook on low for 6 to 8 hours. Then remove the chicken from the slow cooker and shred. Discard any fresh herbs that you originally incorporated into the cooker and return the shredded chicken to the pot. Add in the egg noodles before covering.
4. Continue to cook covered and on low until egg noodles are al dente, about 20 to 30 minutes.
5. **Serve & enjoy!**

MVP: Marc Gauthier

Last quarter's Mitchell Construction Group MVP winner was our Production Manager, Marc Gauthier!

Marc has been with Mitchell Construction for almost 20 years in a multitude of positions, and brings a wide variety of skills to the table. Before joining the firm, he was an expert cabinetmaker, and he continues to draw on his experience with custom work and designs every day.

Marc is known as a bright light both in the office and out in the field, and is always willing to help anyone who needs it. He also instills a positive, can-do attitude in everyone he works with by choosing to call everything a "challenge" instead of a "problem".

Thank you, Marc, for all that you do, and how you do it!

Here are some of the things
our employees had to say:

"I always enjoy listening to Marc speak to clients and how he incorporates the company's culture into the conversation. Keep it up Marc!"

"Marc is always shooting for the stars, and always willing to bring someone alongside him."

"Marc consistently has a positive attitude and seeks to support and bring the best out in each employee."

Thanks For The Thanks!

Thank you to all of our amazing clients for your kind words, and for the trust you put in us to make your dreams come true!

Everyone has been great. Eddie has the perfect demeanor for his role. It's clear that he cares about the client and aptly takes on the impossible task of trying to always keep folks happy.

We hold the whole group in high regard. We have spent most of our time with Mark Y. He is an excellent project manager and a craftsman as well.

The team at Mitchell really listened to us and our needs and delivered on what we wanted. The fact that the company works as a team meant that we had a seamless vision and project plan, with no turf battles or finger pointing, which can happen with these types of project.
